

3-DELAD KULVENTIL I SYRAFAST STÅL DN 8-100 PA 172 MED ELEKTRISKT VRIDDON FÖR VALFRI SPÄNNING

PA Ventiler AB

GO WITH OUR FLOW

PA 172 är en tredelad kulventil av syrafast stål med fullt genomlopp. Gänganslutning DN 8-50 i tryckklass, PN 63 samt DN 65-100 i tryckklass PN 40. Med elektriskt vriddon för valfri spänning. Borstlöst elektriskt 90 graders ställdon med justerbara gränslägesbrytare och antikondensvärmare som standard, IP67-kapsling. Visuell lägesindikering samt möjlighet till manuell manövrering.

KONSTRUKTION

1. SPINDELPACKNINGEN. Är det första steget i skydd mot läckage. Packningen tätar under den roterande rörelsen och fungerar även som lagring.

2. O-RINGEN ÄR DET ANDRA STEGET I EN EFFEKTIV SPINDELTÄTNING. Stabiliserar spindeln och ger förbättrad tätning samt lagring av spindeln.

3. V-FORMAD PACKNING. Det tredje steget består av flera lager av v-formade Chevron-packningar som expanderar horisontellt då de blir utsatta för ett vertikalt tryck vilket motverkar läckage.

4. LÅSBRICKA. Säkrar spindelmuttern.

5. MUTTER. Denna trycker på hela spindelpaketet.

6. BELLEVILLE-FJÄDERBRICKA. Fjäderfunktionen anpassar packningen vid förändring av tryck och temperatur.

7. GLAND AV ROSTFRITT STÅL. Fördelar trycket jämt över packningarna.

8. HÖG YTFINISH. Ytan på spindeln är behandlad för att reducera friktionen mot packningen och ger ett lågt vridmoment.

3-DELAD KULVENTIL I SYRAFAST STÅL DN 8-100 PA 172 MED ELEKTRISKT VRIDDON FÖR VALFRI SPÄNNING

TCR-N ELECTRICAL ACTUATOR

FEATURES

The TCR-N electric actuators are intended for motorising ¼ turn valves with a torque of 15, 20, 50, 110, 200 or 400 Nm. With a compact construction and plastic housing, they are especially well suited for motorising ball valves and butterfly valves. Several variants offer advanced functions. IP67 leak-tightness: to be used indoors and, possibly, outdoors under a shelter. Possible installation in parallel. Manual control with a key.

AVAILABLE MODELS

Supply voltages: 230V AC, 24V AC/DC, 12V DC.

LIMITS OF USE

IP Code	IP 67
Ambient temperature	- 20°C / +60°C
Service factor	S4 - 50% (TCR 02-05-11)
	S3 - 85% (TCR 20-40)

MECHANICAL FEATURES

Gear box	treated steel pinions
Torques	15 - 20 - 50 - 110 - 200 - 400 Nm
Angle of rotation	90° +/- 2°
Declutching	Without (TCR 02-05-11)
	With (TCR 20-40)
Override control	By key

Actuator	TCR 02N			TCR 05N

TCR-N ELECTRICAL ACTUATOR

TROUBLESHOOTING

Defect met	Cause of defect	Method of solving
Inactive actuator	Non-connected electrical grid.	Connect to the electrical grid.
	Wrong voltage.	Check the actuator's voltage.
	Motor overheating.	Check the torque on the valve.
	Faulty connection.	Check the connection to the terminal box.
	Damaged start capacitor.	Contact the supplier for repair.
No switch signal	Faulty connection.	Check the connections.
	Damaged microswitch	Change the microswitch
Valve that is not fully closed	Use the return signal from the actuator check.	Receiving a return signal does not mean that the actuator is fully closed, hence do not cut the power supply.
	The hysteresis increases due to wear or between the actuator and the valve's stem.	Readjust the limit cams. Contact the supplier for repair.
Presence of humidity or water in the actuator	Unsuitable cable cross-section being used.	Contact the supplier for repair.
	The cable connection is not leak-tight.	
	Worn sealing gaskets.	
	Loose cover screws.	Dry the internal parts and tighten the cover screws.
