

The Registration, Evaluation, Authorization and Restriction of Chemicals Regulation EC 1907/2006, commonly referred to as REACH, is a European regulation on chemicals and their safe use. Article 33 of the REACH regulation requires manufacturers to inform their customers if an article contains more than 0.1% (by weight per article) of any substance on the SVHC Candidate list for Authorization, published by the European Chemical Agency (ECHA).

The compliance of Nibe AB products with REACH are based on:

- Controlling the materials and articles that is used in our products by Declaration of Content and/or Compliance statements.
- Assessment of our suppliers to ensure compliance.
- Periodic analysis of our products.

Nibe AB works continuously with product development together with our suppliers to find ways to reduce and eliminate the use of SVHC. The SVHC used in our products do not pose a safety risk to customers under normal use conditions.

Regular communication on SVHC in our products are attached with each product. For product specific data, please visit: [nibe.eu/chemicals](http://nibe.eu/chemicals).
