Environmental Product Declaration

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

Alterna Basic Mirror Cabinet / Alterna Basic Spegelskåp

from

Saint-Gobain Distribution Sweden AB

Program:	The International EPD® System, www.environdec.com
Program operator:	EPD International AB
EPD registration number:	EPD-IES-0020180:001
Publication date:	2025-04-11
Valid until:	2030-04-10

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

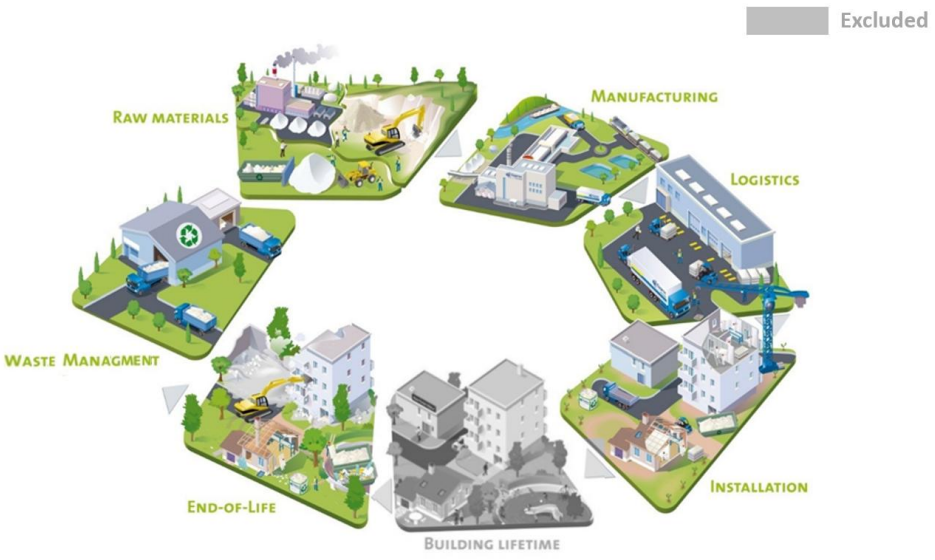
Accountabilities for PCR, LCA and independent, third-party verification
Product Category Rules (PCR): Construction Products PCR 2019:14 version 1.3.4
CEN standard EN 15804:2012+A2:2019/AC:2021 serves as the Core Product Category Rules (PCR)
PCR review was conducted by: T*he Technical Committee of the International EPD System. See www.environdec.com for a list of members. Review chair: Claudia A. Peña, University of Concepción, Chile. The review panel may be contacted via the Secretariat www.environdec.com/contact.*
Life Cycle Assessment (LCA)
LCA accountability: Fanni Végvári, CarbonZero AB
Third-party verification
Independent third-party verification of the declaration and data, according to ISO 14025:2006, via: ☒ EPD verification by the individual verifier Third-party verifier: Stephen Forson, ViridisPride Approved by: The International EPD® System
Procedure for follow-up of data during EPD validity involves third party verifier: ☐ Yes ☒ No

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterisation factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Company information

Owner of the EPD	Saint-Gobain Distribution Sweden AB Bryggerivägen 9 168 67 Bromma Stockholm
Contact	SGDS - Beriar Maroof (beriar.maroof@saint-gobain.se)
Description of the organisation	Saint-Gobain Distribution Sweden AB - specialists in collaboration for more efficient business in construction and installation. Saint-Gobain Distribution Sweden AB is the head company of some of Sweden's leading trading companies in construction, sheet metal, tiles and installation. All the companies have long and solid industry experience and provide most of Sweden's craftsmen with materials for various projects. Customers in different companies can also buy support items from the sister companies in the group, and in selected cases, we take joint projects to facilitate the logistics of the supply of goods, which is then often critical for a smooth construction project. • Optimera - construction trade for professional carpenters • Dahl – heat, plumbing and sanitary specialist • Bevego - building sheet metal, ventilation and technical insulation • Kakelspecialisten and Konradsson's Tiles - tiles, tiling and bathroom fittings The company's focus is on sales and services with direct contact to about 150,000 customers regularly. Saint-Gobain Distribution Sweden AB is owned by Saint-Gobain with a presence in 64 countries and over 190 000 employees worldwide.
Location of production site	Vaggeryd, Sweden

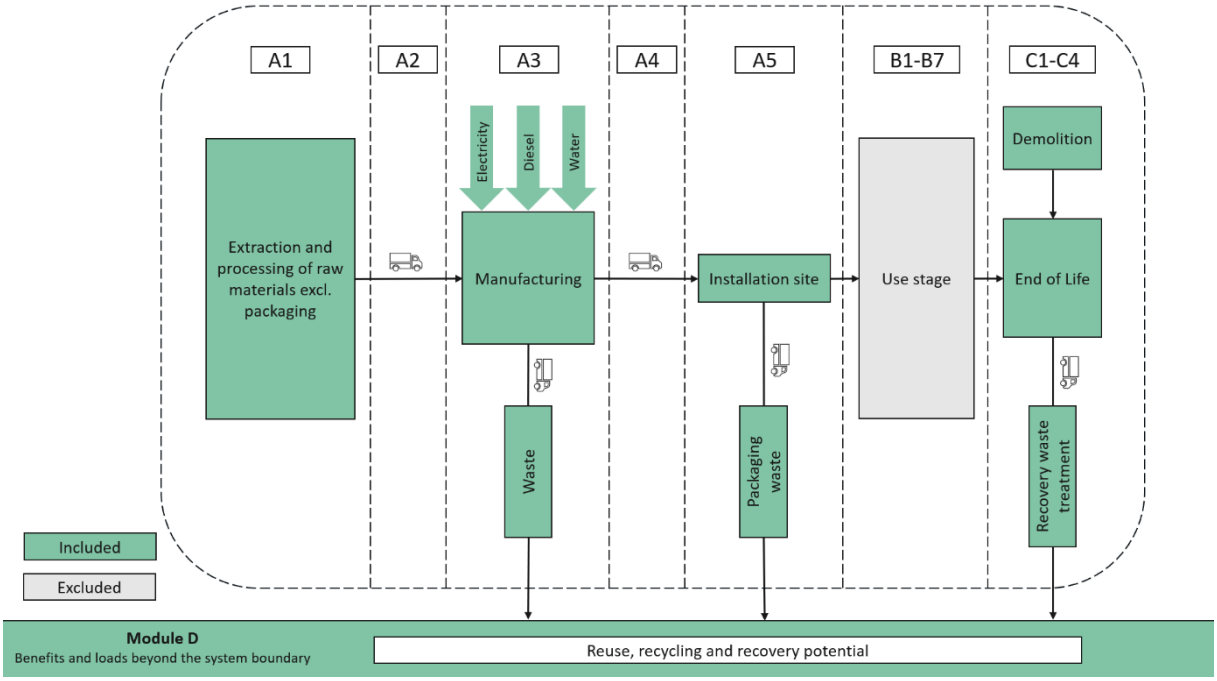


Product information

Product name	Alterna Basic Mirror Cabinet/ Alterna Basic Spegelskåp
Product identification	Bathroom furniture
UN CPC code	31432 Medium Density Fibreboard (MDF)
Product description	Alterna Basic Mirror Cabinet is a classic mirror cabinet with a width of 600 mm. The cabinet has mirrors on both sides, soft-closing doors, and two adjustable glass shelves. There is a power outlet inside the cabinet. The lighting strip is ordered separately.
Technical data	Please refer to the product pages for each specific product as the technical data differs for each product. https://alternabadrum.se/
Use	Alterna Basic Mirror Cabinet/ Alterna Basic Spegelskåp is a functional storage unit commonly used in bathrooms to combine a mirror with concealed shelving. It provides a convenient space to store toiletries, medications, and other essentials while keeping the bathroom tidy. The mirrored surface also enhances lighting and creates a sense of spaciousness in the room.

LCA information

Declared unit	1 kg of Alterna Basic Mirror Cabinet/ Alterna Basic Spegelskåp
Reference service life	Not applicable
Database(s) and LCA software used	Calculation completed in LCA for Experts v10.9.0.31 with an integrated ecoinvent database 3.9.1
System boundaries	Cradle to gate, with options. (A1-A3, A4-A5, C1-C4 & D)



More information

The EPD covers the following product in the table below.

Article number	Description
8947764	Alterna Basic spegelskåp 60 cm vit

A1, Raw material supply

This module considers the extraction and processing of all raw materials, energy, and transportation which occur upstream of the studied manufacturing process. The products are made of MDF, steel, polyethylene and glass.

A2, transport to the manufacturer

This module includes the transportation of raw materials to the manufacturing site and the transportation from the supplier in Sweden to Saint-Gobain's distribution center in Sweden. Specific information from the manufacturer was obtained regarding the transportation distance between the suppliers to the manufacturing factory.

A3, manufacturing

This module includes all resources used during the production of Alterna Basic Mirror Cabinet. The manufacturing processes include the production of components at several different suppliers, which are transported to the assembly factory where the components are assembled. This also includes packaging material which the products are transported out to the distribution centers. Data has been collected by the manufacturer from the production year of 2023, the full 12 months from January 2023 to December 2023.

A4, Transport

This module includes the transportation from Saint-Gobain's distribution center in Sweden, out to the average customer. The assumed transportation distance is 350 km by truck.

Scenario information	Unit (expressed per declared unit)
Fuel type and consumption of vehicle or vehicle type used for transport e.g. long distance truck, boat etc.	Average truck trailer with a 27 t payload 0,019 l/tkm diesel
Distance	350 km
Capacity utilization (including empty returns)	61% for truck
Volume capacity utilization factor (factor: =1 or <1 or 1 for compressed or nested packaged products	Not applicable

A5, Construction installation

This stage includes the waste management of the packaging materials and balancing of the biogenic materials that enter the system in module A3. The pallet and cardboard packaging are being incinerated. The pallet is being reused 10 times before going to incineration; hence the weight represents the wear factor and not the entire pallet. The installation of the product is assumed to have negligible impact, as the installation will be done manually.

Processes	Unit (expressed per declared unit)
Collection process specified by type	0,088307 kg collected separately
	0 kg collected with mixed construction waste
Recovery system specified by type	0 kg for re-use
	0,00819 kg for recycling
	0,0795 kg for energy recovery
Disposal specified by type	0,000617 kg product or material for final deposition

B1-B7 Use stage
This stage is not declared.

C1 Deconstruction/Demolition
This stage includes the de-construction of the Alterna Basic Mirror Cabinet. It is assumed that the deconstruction is done manually and therefore has a negligible impact.

C2 Transport
This module represents the transport distance to the waste processing facility. It is assumed that the transportation distance to the waste processing facility is 50 km.

C3 Waste processing
This module includes any waste treatment needed from recycling and incineration.

C4 Final disposal
This module includes any material that is landfilled.

Processes	Unit (expressed per declared unit)
Collection process specified by type	1 kg collected
	0 kg collected with mixed construction waste
Recovery system specified by type	0 kg for re-use
	0,53358 kg for recycling
	0,4276 kg for energy recovery
Disposal specified by type	0,03898 kg product or material for final deposition
Assumptions for scenario development, e.g. transportation	The transportation is modelled with the same specifications as the truck transportation in module A2, except the transportation distance is assumed to be 50 km to the waste processing.

D Benefits and loads beyond the system boundary
This module includes loads and benefits obtained from energy recovery and/or recycling materials.

Omissions of life cycle stages
The following flows were excluded from the system boundary:

- **A1-A3**: The plants, production of machines and transportation systems are excluded since the related flows are supposed to be negligible compared to the potential environmental impacts through the life cycle of the product
- **B1-B7**: The use phase of the products is not included

In addition, the following flows are excluded from the system boundaries:

- Flows related to human activities, such as employee transport

Cut-off criteria

The following procedures were followed for the exclusion of inputs and output.

- All input and output flows in a unit process were considered i.e., taking into account the value of all flows in the unit process and the corresponding LCI where data was available
- Data gaps were filled by conservative assumptions with average or generic data. Any assumptions in such cases were documented
- The use of cut-off criterion on mass inputs and primary energy at the unit process level (1%) and at the information module level (5%)

All hazardous and toxic materials and substances are included in the inventory and the cut-off rules do not apply.

Allocation

Allocation criteria are based on mass.

Content declaration

Product composition	Amount (kg)	Post-consumer recycled material, mass-% of product	Biogenic material, mass-% of product	Biogenic material[1], kg C/declared unit
MDF	4,16E-01	0	27,1	0,271
Steel	3,95E-02	0	0	0
Polyethylene	1,57E-02	0	0	0
Glass	5,29E-01	0	0	0
Total	***1***	***0***	***27,1***	***0,271***

Packaging composition	Weight, kg	Weight-% (versus the product)	Biogenic material[1], kg C/declared unit
Cellblock	8,81E-03	0,881	0
Cardboard	6,57E-02	6,57	0,03
Pallet	1,38E-02	1,38	0,007
Total	***0,08***	***8,04%***	***0,01***

[1] 1 kg biogenic carbon in the product/packaging is equal to 44/12 kg of CO_2 uptake

Modules declared and geographical scope

Geography	EU	SE	SE	SE	SE	-	-	-	-	-	-	-	SE	SE	SE	SE	SE
Specific data used	4,2%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation products	0%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation sites	0%			-	-	-	-	-	-	-	-	-	-	-	-	-	-

The specific data is based on the amount of impact that derives from the impact indicator GWP-GHG for modules A1-A3.

Environmental Information

The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding threshold values, safety margins and/or risks. As module C is included in the EPD, it is discouraging the use of the results of modules A1-A3 without considering the results of module C.

Potential environmental impact – indicators according to EN 15804+A2, EF 3.1

Information on biogenic carbon content

Biogenic carbon content	**Unit per DU**	**Amount**
Biogenic carbon content in product	kg C	1,76E-01
Biogenic carbon content in packaging	kg C	3,48E-02

1 kg biogenic carbon is equivalent to 44/12 kg CO2.

Disclaimers

ILCD classification	Indicator	Disclaimer
ILCD Type 1	Global warming potential (GWP)	None
	Depletion potential of the stratospheric ozone layer (ODP)	None
	Potential incidence of disease due to PM emissions (PM)	None
ILCD Type 2	Acidification potential, Accumulated Exceedance (AP)	None
	Eutrophication potential, Fraction of nutrients reaching freshwater end compartment (EP-freshwater)	None
	Eutrophication potential, Fraction of nutrients reaching marine end compartment (EP-marine)	None
	Eutrophication potential, Accumulated Exceedance (EP-terrestrial)	None
	Formation potential of tropospheric ozone (POCP)	None
	Potential Human exposure efficiency relative to U235 (IRP)	1
ILCD Type 3	Abiotic depletion potential for non-fossil resources (ADP-minerals&metals)	2
	Abiotic depletion potential for fossil resources (ADP-fossil)	2

	Potential Comparative Toxic Unit for humans (HTP-c)	2
	Potential Comparative Toxic Unit for humans (HTP-nc)	2
	Potential Soil quality index (SQP)	2
Disclaimer 1 – This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.		
Disclaimer 2 – The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experience with the indicator.		

Additional information
