Declaration of compliance with ECHA (REACH) and SCIP database requirements

We, 2VV s.r.o., hereby declare that the full range of all SAVANA INOX product sizes complies with the requirements of the European Union Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)

In compliance with ECHA requirements on SVHCs we have taken the following action:

- evaluated internally and publicly available technical data related to the presence of SVHC substances in our products or any of their components.
- evaluated all available product safety data sheets for all input materials.
- verified with our suppliers any potential presence of SVHC substances in all purchased items.

Also, we, 2VV declare that we are informed that the European Chemical Agency (ECHA) has officially issued a Candidate list of SVHCs (substances of very high concern).

http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp

Companies supplying articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA, as from 5 January 2021.

The SCIP database ensures that the information on articles containing Candidate List substances is available throughout the whole lifecycle of products and materials, including at the waste stage. The information in the database is then made available to waste operators and consumers.

Based on the results of this safety assessment procedure, we have not been aware of any of such substances being present in our products on the EU market in a concentration above 0.1% weight by weight (w/w) and we confirm that there are no such substances present in our products.

This declaration is based on the information available to us and our suppliers as of the date of this declaration. We confirm that:

The product does not contain any substances of very high concern (SVHC) listed on the REACH Candidate List in concentrations above 0.1% weight by weight (w/w).

The product does not contain any restricted substances listed in Annex XVII of REACH.

The product does not contain any substances subject to authorization listed in Annex XIV of REACH.

We will continue to monitor the REACH regulations and update this declaration as necessary.

At the same time, we are committed to continuously meet all the requirements of the European Chemicals Agency (ECHA) including the obligation to inform all our customers regarding any changes in our products.

Filip Hazuka

Managing Director, 2VV
